A new method to immortalize and emphasize nature's finest providing, whether it's for a rustic or household furniture decor.

How to maintain the synchronized texture melamine boards

1. synchronized texture board sticks around the juice, paint stains may use acetone wipe, although easily clean the juice along with other stains, but additionally won't affect the good thing about the environmental board, simultaneously result in the synchronized texture board maintenance better.
2. If pencil marks remain around the synchronized texture board, the synchronized texture board factory uses methanol alcohol to wipe the pencil marks around the synchronized texture board, that won't harm the synchronized texture board, but additionally, result in the environmental board cleanup rapidly.

3. When the synchronized texture board is tied to a lot of it, lipstick, ink along with other dirt, it's recommended to make use of a tiny bit of alcohol to wash, after which make use of a gentle cleanser, and lastly, wipe with wet squeezed dry cloth could be clean.

4. synchronized texture board if there's tea, coffee, strong glue along with other dirt, you should use toluene solvent to wipe. Using toluene solvent to clean tea along with other dirt is extremely convenient, simple to cleanup rapidly, but additionally won't cause any effect on the synchronized texture board.

5. If there's strong label paper around the synchronized texture board, it's suggested to wipe them back having a towel, because the top of the synchronized texture board is melamine, although put on resistant, however, you make use of a hard scratch or damage.

6. For that dirt that can't be easily wiped off, you should use the cotton cloth that isn't simple to depilate and use the mix of white-colored electric water and oil to wash, after which make use of the cotton cloth to use a suitable quantity of water to wash, and immediately wipe dry after
